Code, Compile & Run

ide ✕ +

Contest Code/Name (e.g. JULY15/PRACTICE)

Problem Code/Name (e.g. TEST)

Select

C (gcc 6.3)

Code gets auto saved every second

```
1 #include <stdio.h>
2 int gcd(int x, int y);
3
4 int main()
5 {
6     int num1, num2, hcf, lcm;
7
8     printf("Enter two integer Values:\n");
9     scanf("%d %d", &num1, &num2);
10
11     hcf = gcd(num1, num2);
12     printf("GCD: %d", hcf);
13     printf("\nLCM: %d", (num1 * num2) / hcf);
14     return 0;
15 }
16 int gcd(int x, int y)
17 {
18     if (y == 0)
19     {
20         return x;
21     }
22     else
23     {
24         return gcd(y, x % y);
25     }
26 }
```

Status Successfully executed Date 2020-07-04 05:19:40 Time 0 sec Mem 9.424 kB

Input

10 25

Output

Enter two integer Values:
GCD: 5
LCM: 50

Algorithm for GCD

- Step 1 :- Drop any negative signs
- Step 2 :- Assign the larger to the dividend the smaller to be divisor
- Step 3 :- compute the quotient and remainder
- Step 4 :- Reassign the divisor to be the dividend and the remainder to be the divisor
- Step 5 :- Repeat step 3-4 until the remainder is zero

Algorithm for LCD:-

- Step 1 :- Make R/W low
- Step 2 :- $RS=0$, if data byte is command
 $RS=1$, if data byte is data (ASCII value)
- Step 3 :- Place data byte on data register
- Step 4 :- Pulse E (High to low)
- Step 5 :- Repeat the steps to send another data byte.
